

Global Liquid & Biogas Futures

We are
the future
**Yes, that's an
audacious
statement –
but let us
back that up?**

We are truly the only company in the world with the expertise and experience to specialise in total biogas and liquid storage engineering solutions.

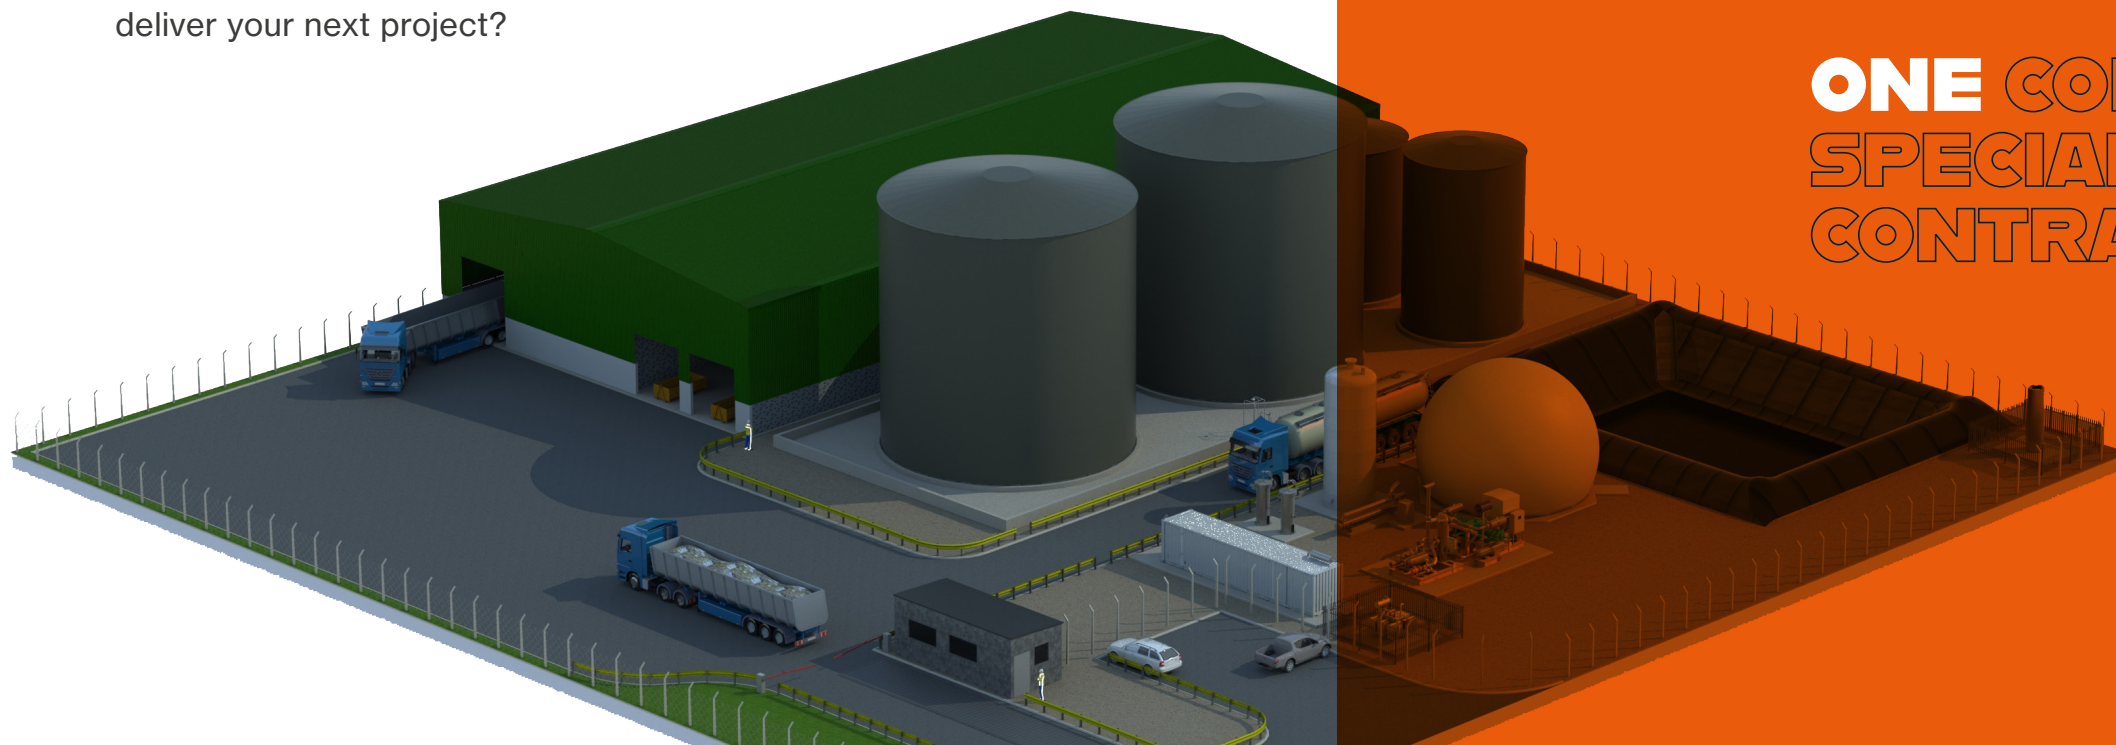

You may think we are simply tank suppliers, we are so much more - we design and engineer bespoke, fully integrated solutions for the water, wastewater and biogas industries.

Our approach is one of collaboration, to fully understand and work with your process and project optimisation. We save you time, money and deliver confidence from concept, installation, delivery and maintenance, to secure future long life asset value.

STORTEC is a true industry leader,
working in partnership to install
hardware assets for process
innovations.

Unrivalled in its knowledge and
experience, we are your total specialist
contractor, from concept and supply
chain to completion and support.

How can we help you win work and
deliver your next project?

**ONE HUNDRED
AND FIFTY YEARS**

CONTRACTOR

Why STORTEC?

Let's tick all the boxes

1 Financial Backing

STORTEC is backed by top environmental sector investors who support our rapid growth and position us as industry leaders. (GVO-B1 is part of a major energy group working in all sectors of the renewable industry with revenues in excess of £100m).

4 Team

We have brought together a truly impressive team who work seamlessly together as a dynamic force. The team has over 150 years' combined industry experience reinforced by exceptional technical knowledge and a forward thinking, fresh approach.

7 Values

STORTEC has been formed on principles of trust and service. We are your partners and as such never lose sight of the importance of integrity and reliability to deliver industry best practice.

10 Freedom

We select the best material solutions for clients requirements. Providing bespoke solutions and delivering the most economic process, giving the best value.

2 Design Innovation

We are leading the field in innovative design and working with all our clients in developing bespoke solutions that meet process and asset demands.

5 Engineering

We have invested heavily in both people and software to design solutions that will save you time and money. Our engineering expertise will realise your project or plant in virtual reality 3D visualisation as a complete solution, anticipating every eventuality prior to being on site.

8 Insurance & Warranty

Full insurance including P.I. meeting all industry requirements. Supported by insurance-backed warranty guarantees.

11 Return on Investment

Our solutions are so thoroughly tested and devised that we are confident there will be no costly surprises at installation stage, no wasted down time due to our proposals and complete peace of mind through warranties and our ability to manage the assets into the future giving extended lifespans.

3 Accreditations

We are Chas / Achilles / UVDB accredited.

6 Track record

Our team have worked on ground breaking projects across the globe including In our first year alone STORTEC have designed and delivered over £6m of completed works for United Utilities, Thames Water, Severn Trent, Southern Water, Welsh Water, working through framework contractors such as Nomenca, Costain, Stantec, Skanska, Interserve, CDMP.

9 Lifetime Asset Management

Lifetime maintenance means exactly that - expert assessments and maintenance for your schemes and products for the rest of their lifespan. Asset Life Management, extending already robust and efficient tank lifespans. We have pioneered our own GOLD MEMBERSHIP card which delivers extended asset life solutions with insurance backed guarantees.

12 Global Delivery

STORTEC have unlimited reach, providing hardware anywhere in the world. We can build whenever, wherever, across all continents.

One STORTEC Engineering Solution

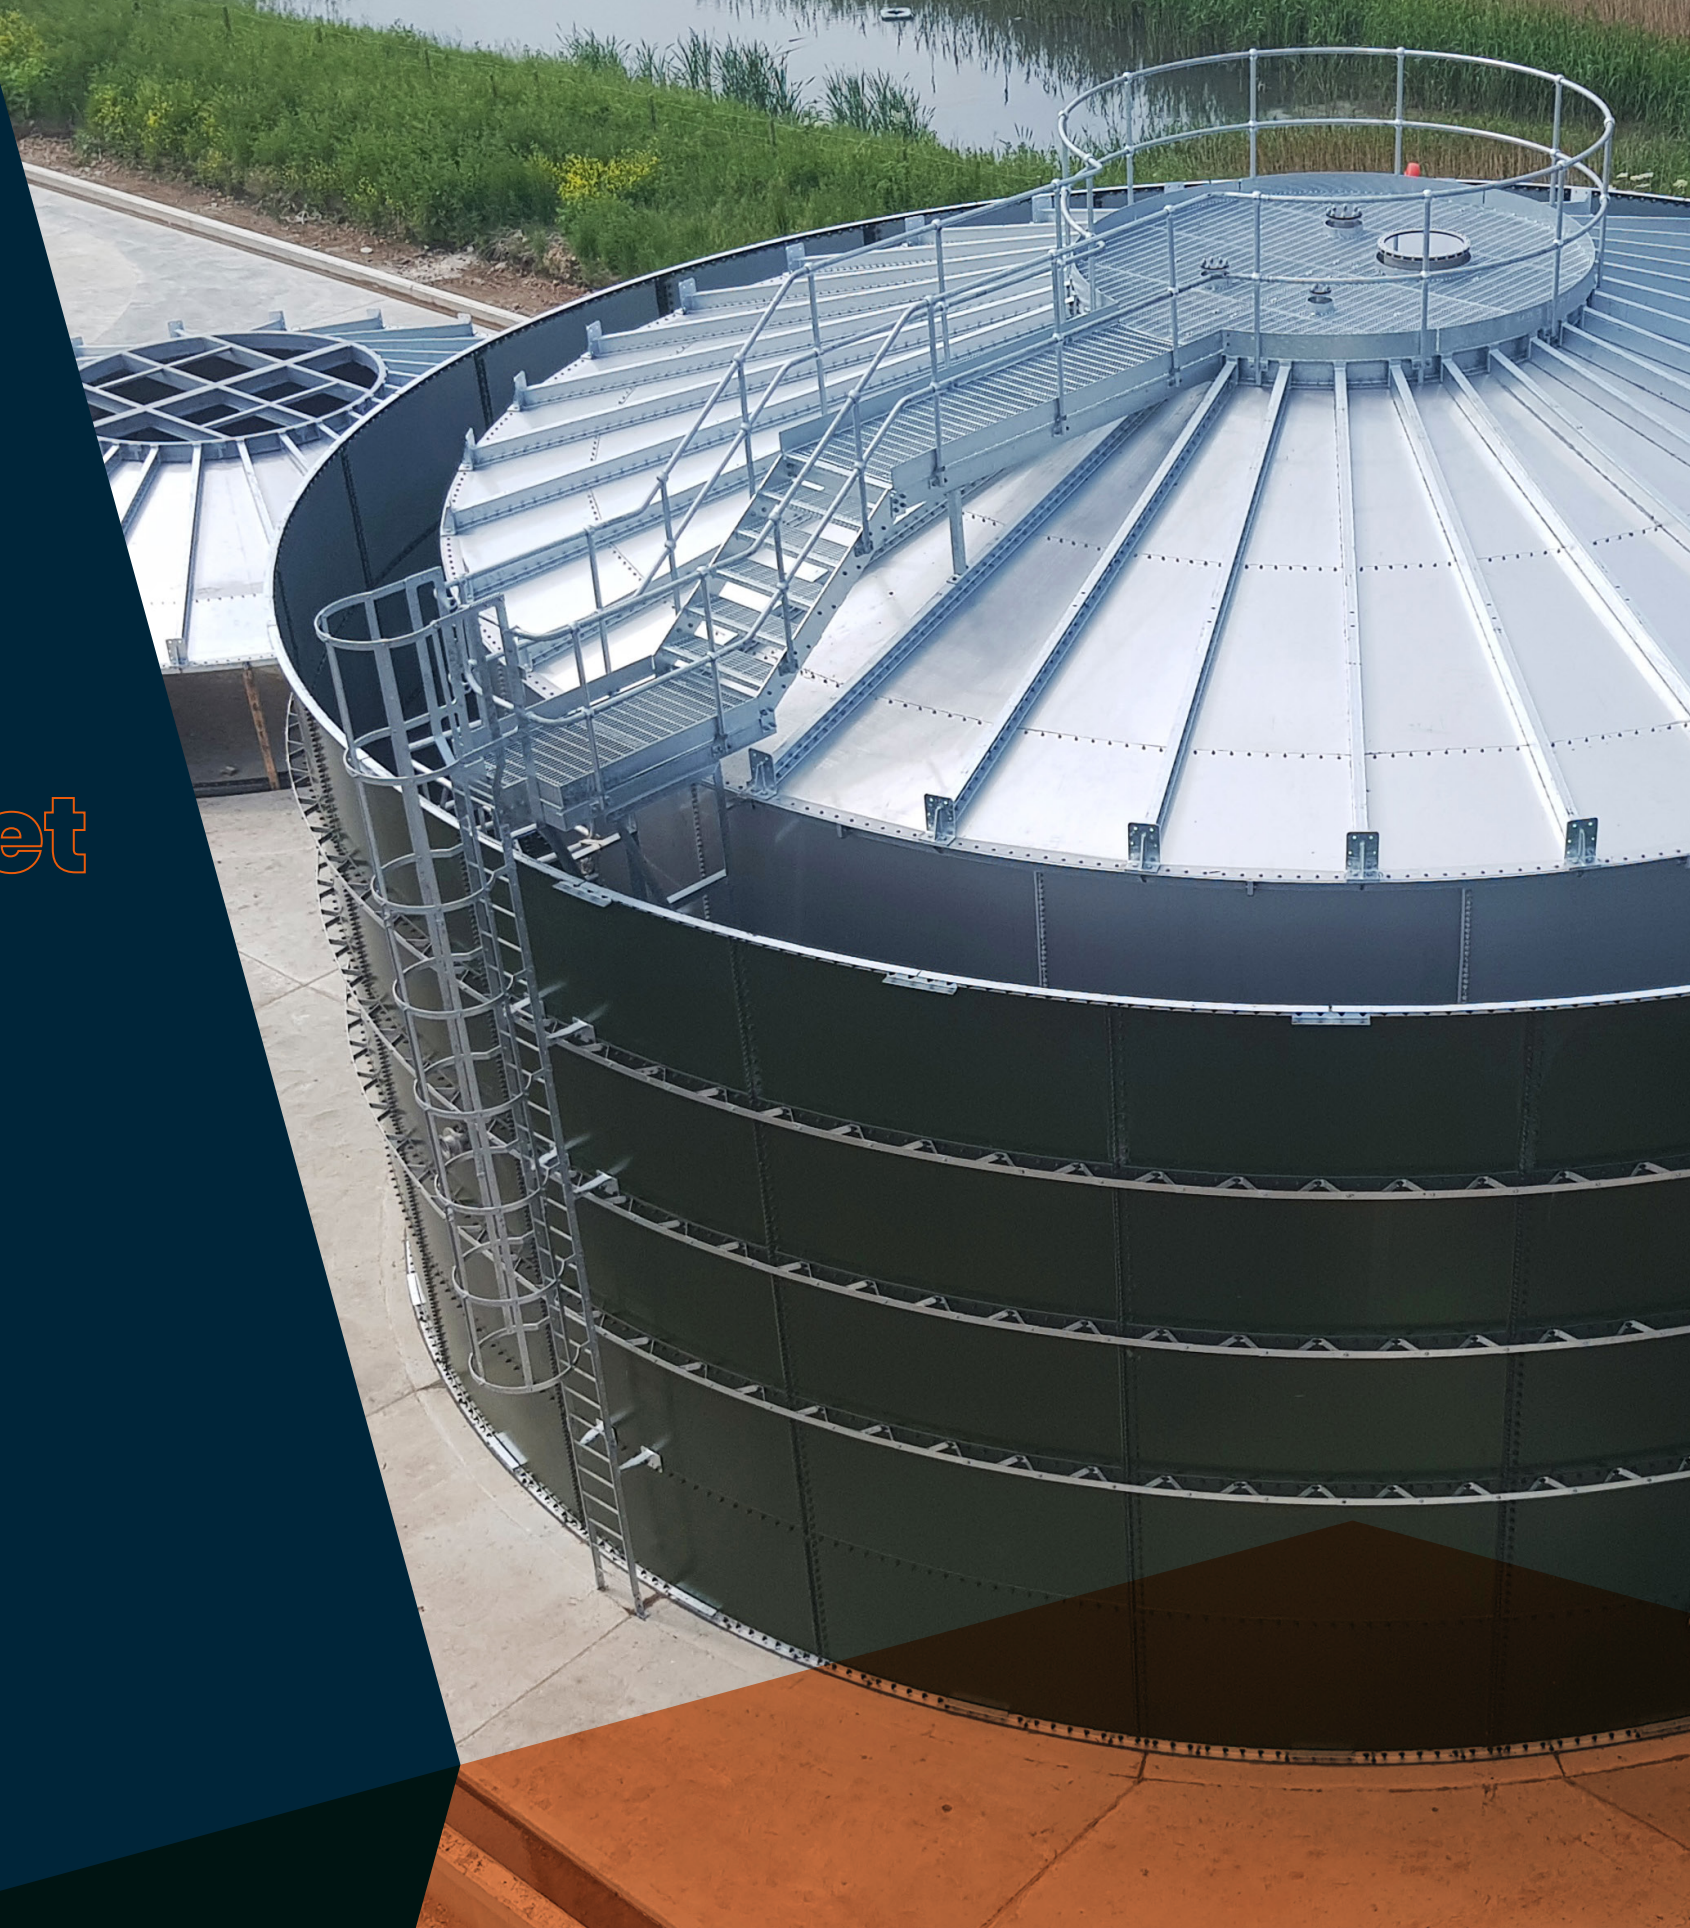

A leading vegetable supplier recently made significant extensions to their anaerobic digestion plant as part of their upscaling works.

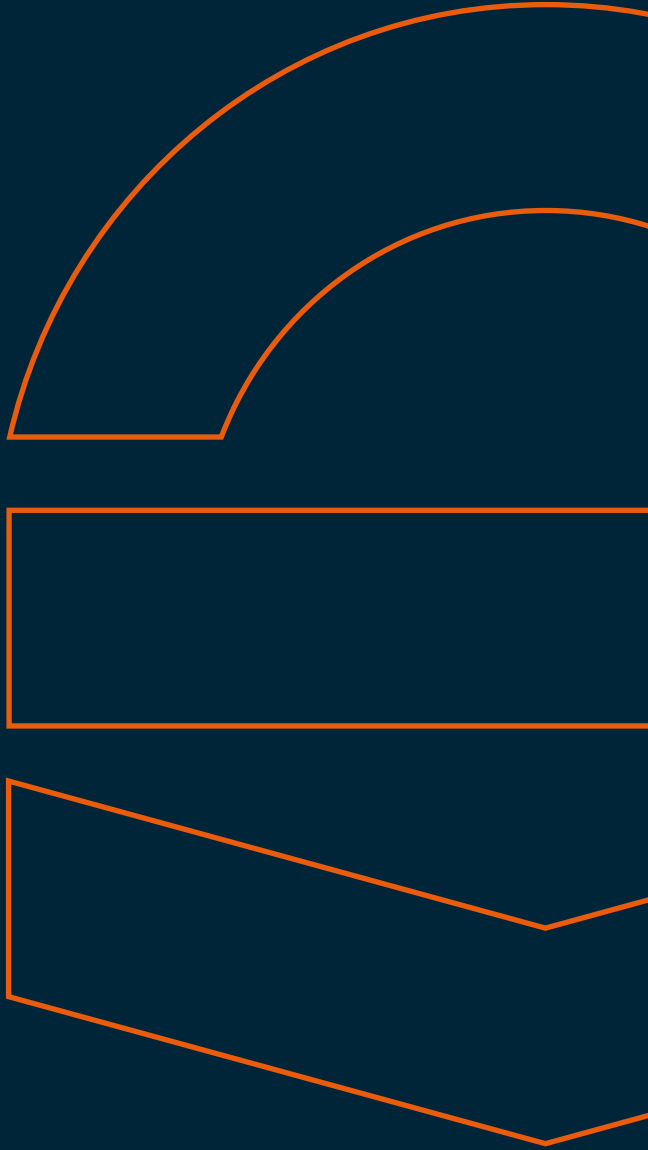

STORTEC delivered further capacity totalling 1500 cubic metres. This increase in digestion capacity required the use of three new steel tanks that will aid flexibility of process. Each tank boasts galvanised mild steel bunds, access steelwork and pipework, and will utilise STORTEC's Gold Card installation service.

Our Vision— To Deliver and Extend the Asset Design Life

STORTEC are spearheading the future of sustainable water and biogas through expertise, investment and innovation to provide effective, efficient, best value solutions to the industry.

Engineering is at the core of our vision. STORTEC have worldwide knowledge of design codes and working practice. Providing design development to 'as built' records with complete asset management documentation.
