**360° SOLUTIONS PROVIDER**

# DELIVERING DIFFERENCE TOGETHER

# 2025

**Building big futures for our clients, our team, and our planet sustainably**

**STORTEC provides a contracting service that will deliver improvement in capital expenditure, programme durations, sustainability and improve efficiencies.**

STORTEC Engineering was formed in February 2018, driven by an ethos of sustainability and core values. STORTEC is a specialist contractor providing solutions for the storage of liquid and biogas. We provide a total package solution, offering a complete service to the construction industry from conception to optimisation, delivering best value and innovation.

We operate in the Water, Wastewater, Industrial Waste and Renewable Energy Industries. Our flexible approach sees us delivering projects extending from basic storage solutions to full turnkey treatment plants.

**Resilience**

We have the ability to adapt, overcome challenges and maintain strength. Focusing on growth, embracing change and building strong, supportive relationships.

**Sustainability**

We are committed to protecting our environment through our innovative and sustainable products. Ensuing our materials are designed for reuse and recyclable.

**Innovation**

We think outside the box, bringing technologies and solutions to our clients that ensure a positive impact on the planet.

**Collaboration**

We work dynamically with our clients to achieve success. Collaboration accelerates progress, creating a collective achievement.

**Integrity**

We believe in honesty, accountability and transparency. Building and maintaining trust by being reliable and consistent.

**Teamwork**

Our TEAM work together to pool their expertise and perspectives, delivering 'top notch' quality products and installations.

**Inclusivity**

We have created a solid foundation where everyone is valued, respected and empowered. We thrive on celebrating our TEAM who are the key to STORTEC's success.

**STORTEC is a true industry leader, working in partnership to install hardware assets worldwide.**

Whilst operating as a Specialist Contractor, our business also complements these works, manufacturing our own products which are key to the supply. From concept to full inhouse design and production we have developed our ULTRASTORE® Stainless Steel Tank system. This innovative product offers both performance and sustainable advantages against traditional solutions in the market. Furthermore, by conducting these works internally we can control and manage a key element of the supply chain, resulting in improved programme and TOTEX costs for our customers.

# Why STORTEC?

We tick all the boxes

## Financial

Our growth is built upon the foundations set over the recent years. STORTEC are backed by top environmental sector investors who support our rapid growth and position us as industry leaders.

## Accreditations

We are accredited to: CHAS, Achilles UVDB, ISO:9001, Constructionline (Gold), Builders Profile, Carbon Net Zero, Cyber Essentials & ECOVADIS.

## Values

STORTEC has been formed on principles of trust, service, innovation and sustainability. We are your partners and as such never lose sight of the importance of integrity and reliability to deliver industry best practice.

## Freedom

Our independence provides us the flexibility to tailor the solution to the clients' requirements, selecting the best material for the application. Providing bespoke solutions and delivering the most economical result.

## Design Innovation

We are leading the field in innovative design and working with all our clients in developing bespoke solutions that meet process and asset demands.

## Engineering

We have invested heavily in both people and software to design solutions that will save you time and money. Our in-house engineering expertise will realise your project or plant in detailed 3D visualisation as a complete solution, identifying interfaces, efficiencies and integrating multi-trade services prior to being on site.

## Insurance & Warranty

Holding a host of comprehensive insurance cover, including professional indemnity, we meet all industry requirements.

## Return on Investment

Our independence allows us to offer sustainable solutions, offering longer asset life, creating residual value, giving our clients complete peace of mind from the start and into the future.

## Track record

Our team have worked on groundbreaking projects across the globe. The STORTEC team have delivered over £75m of completed works for: United Utilities, Thames Water, Severn Trent, Southern Water, Dŵr Cymru (Welsh Water), Uisce Éireann (Irish Water) and many more, working through framework contractors such as Costain, Tilbury Douglas, MWH Treatment, Skanska, Veolia, Nijhuis Industries, EPS & CMDP.

## Team

We have brought together a truly impressive team who work seamlessly together as a dynamic force. The team has over 300 years' combined industry experience, reinforced by exceptional technical knowledge and a forward-thinking, fresh approach.

## Lifetime Asset Management

Lifetime maintenance means exactly that - expert assessments and maintenance for your schemes and products for the rest of their lifespan. Asset Life Management, extending already robust and efficient tank lifespans. We have pioneered our own GOLD MEMBERSHIP card, which delivers extended asset life solutions.

## Global Delivery

STORTEC have unlimited reach, providing hardware anywhere in the world. We can build whenever, wherever, across all continents.

# BIODOME®

BIODOME® is a world-leading double membrane gas holder system. Designed and manufactured in the UK, the globally renowned system is a cost-effective solution for the storage and utilisation of Biogas.

Each installation is tailored to meet the individual project demands for storage volume, pressure and gas flow requirements. The system offers unrivalled performance and flexibility.

10

ULTRASTORE® is our in-house developed sectional Stainless Steel Tank system. From the outset, STORTEC has always been determined to use our combined experience to develop new and innovative solutions.

The ULTRASTORE® product range starts at 6m³ and extends to over 10,000m³ volume and the system can be fitted with the same ancillaries as other modular tanks such as roofs, launders and steelwork.

11

# ULTRASTORE®

# BRIDGES & SCRAPER SYSTEMS

STORTEC's range of scraper bridges have been engineered to meet the demand of both municipal and industrial sites, ensuring that effective design and construction methods reduce delivery times and ensure robustness in service.

# HOLME BIOENERGY PROJECT

**Value**  
£9,800,000

**End User**  
Private

**Scope**  
Design and construction of AD plant (Principle Contractor & Designer)

**2-OFF Digester Tanks**  
Diameter: 23.910m  
Height: 10.119m  
Volume: 3850m<sup>3</sup>

**1-OFF Hydrolysis Tank**  
Diameter: 13.663m  
Height: 9.760m  
Volume: 1200m<sup>3</sup>

STORTEC carried out initial excavation works and Civil works including the bund. Three bespoke tank bases were installed in preparation for tank installation. All work carried out by STORTEC with a permanent STORTEC Site Manager.

All elements of the project installed by STORTEC including pipework, Steelwork, electrical and mechanical works. The Ground Mounted Gas Holder installed is a STORTEC designed double membrane Biodome®.

ULTRASTORE® Stainless Steel Tank Installed using our specialist Jacking Equipment.

The project consisted of the Design and Installation of 5-OFF Tanks. Included in STORTEC's scope was the excavation of site, laying out of underground pipework and installing tank bases.

All 4 Settlement Tanks were fitted with a Launder and Half-Bridge Thickener unit. All of the tanks are constructed from Stainless Steel panels. Also included in our scope were the Peripheral Walkways around the Settlement Tanks.

Delivered under budget, Completed 4 months ahead showcasing innovation and a partnership delivery approach.

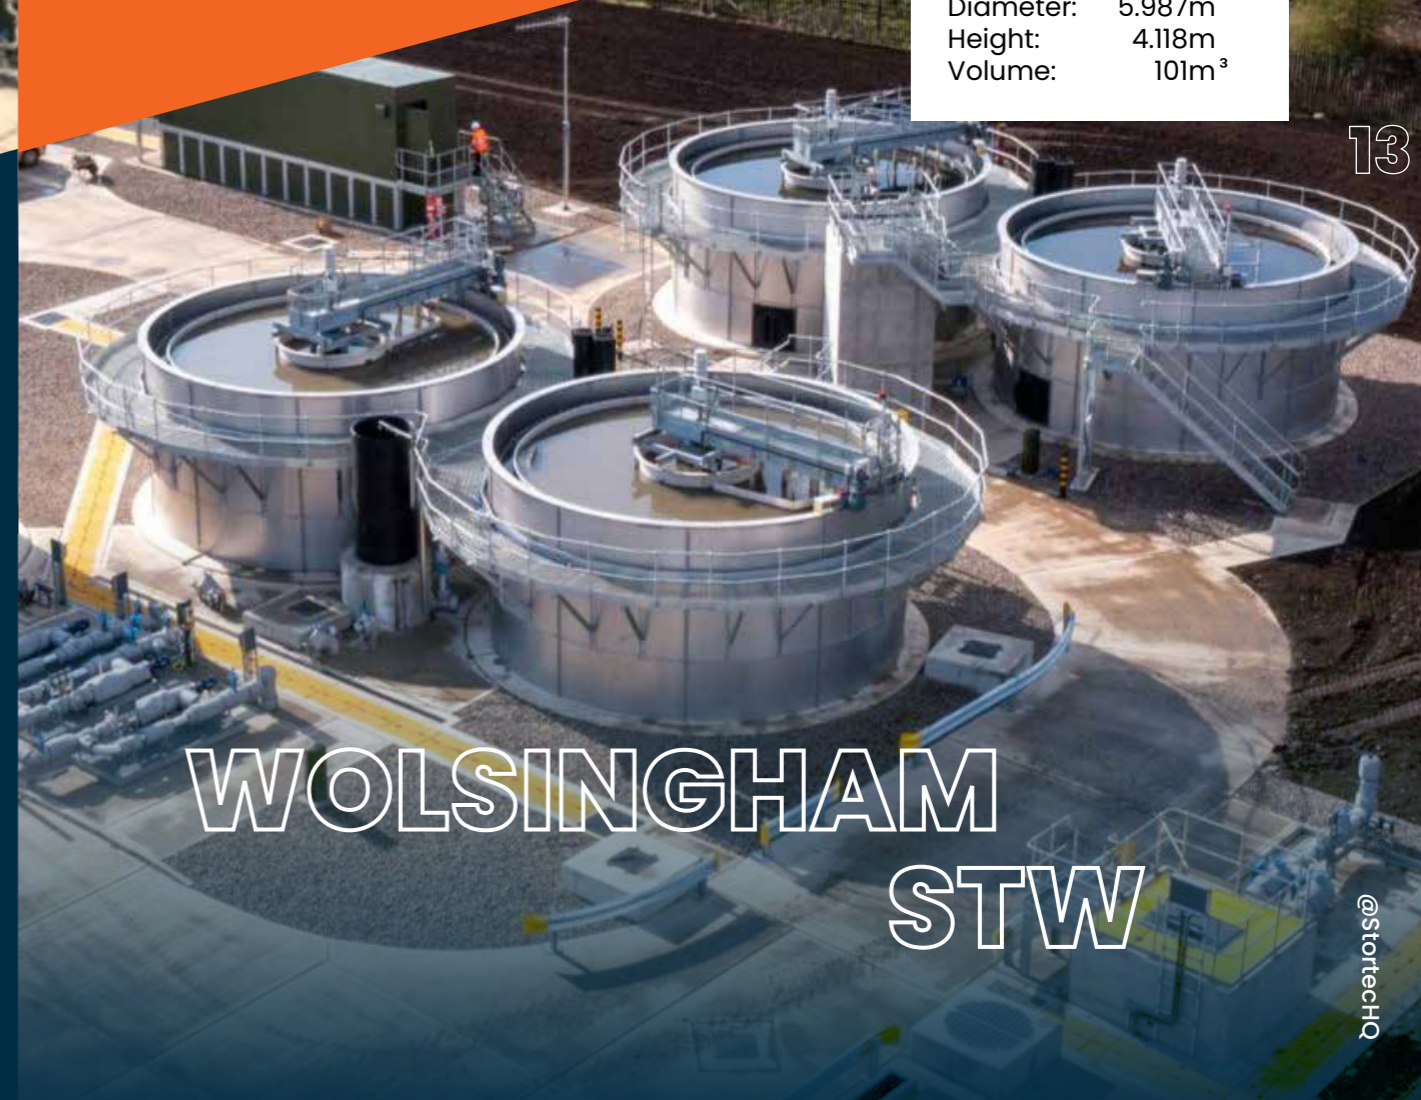

**Value**  
£700,000

**End User**  
Northumbrian Water PLC

**Scope**  
Multiple Tank Package including Mechanical, Electrical and Civils

**2-OFF Primary Settlement Tanks**  
Diameter: 8.539m  
Height: 4.118m  
Volume: 207m<sup>3</sup>

**1-OFF Sludge Tank**  
Diameter: 5.987m  
Height: 4.118m  
Volume: 101m<sup>3</sup>
